

US 59
LAREDO TO HOUSTON

FACT SHEET

STATEWIDE AND RURAL CONNECTIVITY
Key Corridors
TPP DIVISION

DISTRICTS: CORPUS CHRISTI, HOUSTON, LAREDO, SAN ANTONIO, YOAKUM

REVISED: SEPTEMBER 2025

The Texas Department of Transportation’s (TxDOT’s) Statewide Rural Connectivity Initiative is focused on systematically upgrading rural corridors on the Texas Highway Trunk System (TTS) to four-lane divided or better highways.

The TTS provides safe, reliable, high-speed travel between economic activity centers – e.g., major cities, oil and gas production areas, deep-draft sea ports, land ports of entry, and agricultural areas - in Texas while supporting the economic health of communities along the corridors. These communities along rural connectivity corridors are defined as small and medium size cities outside urbanized areas that benefit from improved access to markets throughout the state.

The Statewide and Rural Connectivity Task Force guides and provides strategic direction on the prioritization of Key Corridors on the TTS for upgrade to four lane divided or better highways.

US 59 from Laredo to Houston is one of the key corridors identified by the Statewide and Rural Connectivity Program for improvement to a four-lane divided corridor. This key corridor is a major freight corridor that connects Laredo (the number one land border crossing in the U.S.) and the Port of Houston (the number one sea port in the U.S. in terms of tonnage), provides an alternative to the I-35 and I-10 corridors, continues development of I-69, and connects to Texas sea ports.

Safety Along Corridor

In 2024, statewide rural crashes occur 1.8 times as often on undivided highways than on divided highways. Rural undivided roadways account for 2 in 3 rural crashes and 3 in 4 rural fatalities.

Between 2019-2024	
Number of Crashes	Number of Fatal Crashes
6,311	117

Source: TxDOT Crash Records Information System (CRIS)

Investments Needed to Address Crash Hotspots
\$238.2 M (High-level Estimates)

Source: TxDOT Road Inventory and TxDOT Crash Records Information System (CRIS) Connecting Texas 2050 Statewide Long-Range Transportation Plan

Crash hotspots are locations where crash rates are equal to or higher than 90 crashes per hundred million VMT.

Key Corridor Supports Texas’ Economic Prosperity and Communities

Socio-economic Demographics	
7.3 M people	3.2 M jobs

Source: 2024, U.S. Census Bureau & U.S. Bureau of Labor Statistics
Includes county that the corridor traverse plus adjacent county

Support Manufacturing Sector’s Contribution to Texas GDP*
\$94.2 B

Source: U.S. Bureau of Economic Analysis (2023 GDP in current dollars)
Includes establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products.

Annual Average Daily Traffic
2K - 57k

Source: 2024 TxDOT Roadway Inventory Annual Data

Support Wholesale & Retail Trade Sector’s Contribution to Texas GDP*
\$118.7 B

Source: U.S. Bureau of Economic Analysis (2023 GDP in current dollars)
Includes establishments engaged in wholesaling and retailing merchandise, generally without transformation and rendering services incidental to the sale of merchandise.

Annual Average Daily Truck Traffic
371 - 17K (~29% of all traffic)

Source: 2024 TxDOT Roadway Inventory Annual Data

Support Energy Sector’s Contribution to Texas GDP*
\$51.6 B

Source: U.S. Bureau of Economic Analysis (2023 GDP in current dollars)
Includes establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas.
* Includes county that the corridor traverse plus adjacent county

Key Corridor Characteristics

The Texas Highway Trunk System (TTS) is a network of rural highways that aims to improve rural mobility, connect major activity centers (i.e., connections to communities over 20,000 population and connections to commerce), and provide access to ports of entry into Texas. The goal is to upgrade these highways to 4-lane or better divided highways.

Summary of Corridor Progress				
Total Corridor Length	To TTS Standards	Not to TTS Standards		Total
	4+ Lane Divided	2 Lanes	4 Lanes Undivided	
263 mi	122 mi (46%)	136 mi	5 mi	141 mi

Based on the 2024 TxDOT Roadway Inventory as well as an aerial satellite image review that used 2024 imagery from TxGIO

Corridor Project Summary

Completed (Since 2019)
2.3 mi (\$19.1 M)
