

US 69 & US 175
BEAUMONT TO DALLAS

FACT SHEET

STATEWIDE AND RURAL CONNECTIVITY
Key Corridors
TPP DIVISION

DISTRICTS: BEAUMONT, DALLAS, LUFKIN, TYLER

REVISED: SEPTEMBER 2025

The Texas Department of Transportation’s (TxDOT’s) Statewide Rural Connectivity Initiative is focused on systematically upgrading rural corridors on the Texas Highway Trunk System (TTS) to four-lane divided or better highways.

The TTS provides safe, reliable, high-speed travel between economic activity centers – e.g., major cities, oil and gas production areas, deep-draft sea ports, land ports of entry, and agricultural areas - in Texas while supporting the economic health of communities along the corridors. These communities along rural connectivity corridors are defined as small and medium size cities outside urbanized areas that benefit from improved access to markets throughout the state.

The Statewide and Rural Connectivity Task Force guides and provides strategic direction on the prioritization of Key Corridors on the TTS for upgrade to four lane divided or better highways.

US 69 and US 175 from Beaumont to Dallas is one of the key corridors identified by the Statewide and Rural Connectivity Program for improvement to a four-lane divided corridor. This key corridor is a potential alternative to I-45, provides freight economic opportunities for communities along the corridor, serves as a Hurricane Evacuation Route, is part of the future I-14 system, and serves as a strategic connection to the Port of Beaumont.

Safety Along Corridor

In 2024, statewide rural crashes occur 1.8 times as often on undivided highways than on divided highways. Rural undivided roadways account for 2 in 3 rural crashes and 3 in 4 rural fatalities.

Between 2019-2024

Number of Crashes	Number of Fatal Crashes
6,692	133

Key Corridor Characteristics

The Texas Highway Trunk System (TTS) is a network of rural highways that aims to improve rural mobility, connect major activity centers (i.e., connections to communities over 20,000 population and connections to commerce), and provide access to ports of entry into Texas. The goal is to upgrade these highways to 4-lane or better divided highways.

Summary of Corridor Progress

Total Corridor Length

246 mi

To TTS Standards

4+ Lane Divided

181 mi (74%)

2 Lanes

59 mi

Not to TTS Standards

4 Lanes Undivided

6 mi

Total

65 mi
